

Turney *fieldforce*

Autumn Cultivation Offering

By the time you read this the combines will be well into the rape and barley and some of you will have started wheat harvest.

At Turney Fieldforce we have also been busy planning which cultivation machines we will be demonstrating this autumn along with ordering machine for stock.

Turney Fieldforce has access to the some of the most versatile machines from the world's top manufacturers and have the following machines available for you to try on your farm:-

Turney Fieldforce CLM 3.0 metre, 7 leg auto-reset machines in stock.

The Kverneland CLM is suitable for all soil conditions not only for primary stubble cultivation but as a preliminary seedbed preparation tool as well. The notched leveling discs are mounted on taper roller bearings and are height adjustable by pin or screw and are staggered to avoid blockages. The 460 mm wing ensures that the entire width is worked. "Auto-reset" tines with Kverneland leaf spring protection for use in stony/hard conditions. The CLM comes with a choice of rear roller.

Turney Fieldforce Topdown demo unit – TD300 (3m) and TD400 (4m)

The flexible TopDown cultivator from Väderstad offers a broad spectrum of possibilities. The great advantage is that the TopDown is capable not only of shallow tillage but also deeper tillage when the need arises. Working depth can be adjusted steplessly between 5 and 25 cm. This means that TopDown has a wealth of variation and a range of applications encompassing almost everything that could be required from a modern soil tillage machine.

Turney Fieldforce McConel Discaerator demo unit – 3.0m, 7 leg, 600mm packer

The Discaerator combines two rows of large diameter discs with the low-draught design of the company's subsoiler leg. Two rows of 500mm discs are positioned at 15 degree angles between a five or seven leg subsoiler configuration and immediately in front of the large 600 or 800mm packer roller.

We also have McConel shakaerators and McConel hedgecutter in stock at special out of season prices.

Turney Fieldforce HE-VA 3.0 metre, 5 leg subsoiler machines in stock.

The HEVA Subsoilers are designed for minimum draft and maximum heave without bringing large unwanted clods to the surface. The HE-VA Subsoilers comes in 4 frame sizes 3m & 3.5m rigid and 4m & 5m hydraulic folding with a number of different leg options to create the correct specification to do the best job on any individual farm. Add an Opico variocast 8 air seeder for cost effective OSR establishment.
